

CHLORINE AND SULFUR DIOXIDE

LEAK INDICATORS

Chlorine and sulfur dioxide gas leaks can be easily & safely identified with aqua ammonia vapors. Chlorine/sulfur dioxide safely react with aqua ammonia vapors to form a noticeable white cloud that identifies the source of the chemical leak.

PART #LIB

Package Consists of:

- 1pc. 16 oz. (500ml) Indicator Bottle
- 1pc. 16 oz. (500ml) Refill Bottle with 26° Baume Aqua Ammonia*
- 1pc. Plastic Storage Bag
- 1pc. Instructions and MSDS

*Aqua ammonia refill bottle and solution is shipped separately.

INDICATOR BOTTLE

Note: Only ammonia vapors should be released from the indicator bottle. Release of liquid ammonia may cause adverse reactions with contacted materials. Leak indicator bottles should only be used by trained personnel with appropriate personal protective equipment.
