

Pellet Screens for Vented Hatch Covers

Hopper Car Parts

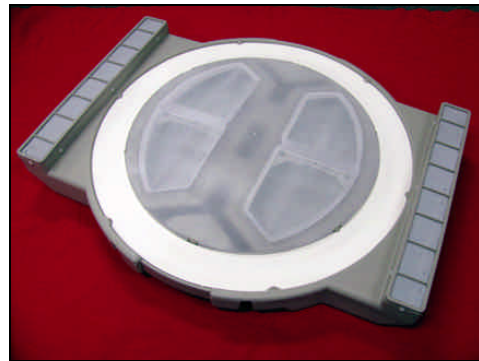

## Retrofit Your Existing Salco Hatch Covers With Our Redesigned Pellet Screen

*Clogged screen filters can obstruct venting.*

*To ensure maximum performance, establish a regular inspection schedule to determine when screen filters should be cleaned or replaced*

**New Features Include:**

- Durable (polypropylene), one-piece design allows for quick, easy removal for cleaning or replacing. No more snap-in hooks or rivets to deal with
- Installs over hatch cover gasket tabs. Six tabs for securement. Installed hatch cover gasket provides further securement
- Patent pending design

*Fits VHC98 and newer Salco covers*

*Maintaining and replacing your pellet screens has never been easier...*

To install, align and gently press down until screen snaps in place. For cleaning or replacing, remove the gasket. Lift the screen at each tab location until it clears the gasket tabs and then pull away from cover
