

87A-200 Series Ball Valves

TANK CAR

Part Number: 87A-207-01

Apollo® Series 87A and 88A are becoming the industry's preferred flanged ball valves since they include many standard features available only as costly options on other brands.

BUILT TO LAST

These Class 150 valves feature a blowout-proof stem design that meets API 608 torsional requirements. Their dual position lock plate (another standard feature) meets OSHA lockout/tagging regulations.

PRODUCT DETAILS

- AAR Approved, No. E119030
- Multiple sizes available from ½" - 6"
- Full-port allows for maximum flow
- Blowout-proof stem design
- Meets OSHA lockout/tagging regulations
- Equipped with a grounded ball and stem
- Fire safe

ACTUATOR FRIENDLY

The valves are "actuator friendly" featuring an ISO 5211 mounting pad. The valves are equipped with a grounded ball and stem. The ball is vented in the stem slot to relieve body cavity pressure in the open position. A heavy-duty 316 stainless steel gland plate mates with the Racking gland to assure secure, self-aligning compression of the packing.
