

AAR MSRP Section C-III M-1002 **TANK CAR MANUAL TECHNICAL REQUIREMENTS TRAINING**

MAY 18-19, 2021

MICROSOFT TEAM VIEW WEBINAR

Training Overview

Cost: \$600 per student. Certificate of training and testing will be provided. Interested parties can register at:

https://salcoproducts.formstack.com/forms/tcs_training_registration

Requirements: PC to use pdf versions of AAR's C-III, or hard copy of it. Updated Chapters and Appendices that have been issued by AAR since the November 2014 Edition was published will be covered and discussed. Especially and including Chapter 1, issued under the latest CPC-1354 on December 19, 2019, and the implementation of Appendix B issued under the latest CPC-1362 on April 14, 2020.

Who Should Attend: Anyone involved in compliance with the Association of American Railroads' (AAR) Manual of Standards and Recommended Practices, (MSRP) Section C, "Car Construction Fundamentals and Details," including S-2034, Car Builder Certification, and especially Section C, Part III, Specifications for Tank Cars, M-1002.

Suggested participants: Railroads, Shippers, Rail Car Manufacturing and Maintenance Facilities, QA Managers, Production Managers, Operations Management, Fleet Management, Car Owners, that deal with railroad tank cars, as well as companies interested in pursuing these markets.

Program Goals: Review of the federal and industry requirements and associated technical certifications, with not only the initial facility certification, but how to perform the functions to achieve compliance. Note: This course is intended to aid the student with an understanding of the technical requirements of railroad tank cars, how the technical requirements intertwine with the quality assurance requirements, and how to research and obtain answers to questions.

Course Agenda

TIMING ADJUSTED AS NECESSARY FOR SUBJECT MATTER DISCUSSION

DAY ONE: TUESDAY, MAY 18, 2021 - 9AM TO 4PM
