

Railroad Clearance Marker

RAIL/YARD ACCESSORIES

Salco Clearance Marker
Part Number: CM12YS

Clearance markers are essential safety devices in rail freight yards, providing clear visual guidance to prevent fouling accidents, maintain safe clearances, and enhance overall safety and efficiency of rail operations.

FEATURES & BENEFITS

- Extremely bright cube-corner micro-prismatic Reflexite AR 1000 sheeting on both sides
- Visible at a distance of 1,000 feet
- Installs in minutes
- Constructed of extremely tough, self-righting, flexible UV-stabilized polyurethane polymer
- Flexible material does not present a tripping hazard
- Approved for use by a Class 1 railroad. Meets Federal Regulation 49 CFR part 218.101(c)
- Self-tapping application screws included
- Additional application option of butyl adhesive pad available upon request

AVOID FOULING ACCIDENTS

Reduced visibility due to factors such as fog, rain, or darkness can increase the risk of fouling accidents by impairing the ability of train operators and yard personnel to see obstructions or other hazards on the tracks.
